

Design your shelter and label it:

What materials will you use?

1. _____

2. _____

3. _____

4. _____

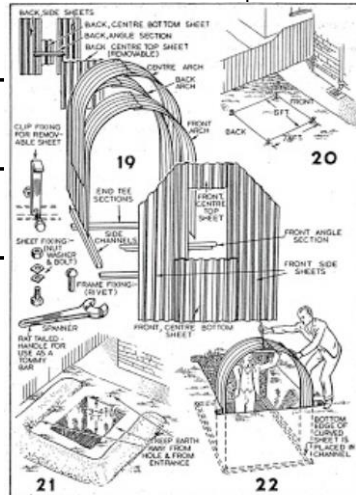

5. _____

6. _____

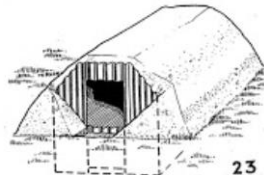

7. _____

8. _____

9. _____

19. The individual parts of the Government Steel Shelter as they are delivered, with detail of each part. 20. The actual size shown should first be marked out in the ground. 21. The diagram shows the hole dug to its final depth. 22. Erecting the end section. Two men are required for this part of the task.

23. The Government Steel Shelter actually in position and provided with an earth covering. A hole is dug in front of the shelter to a depth of 18 inches, and it is recommended that a minimum of 18 inches of soil be provided.
